

CONNECTING YOU TO THE POWER OF  
**INFORMATION IMMEDIACY™**

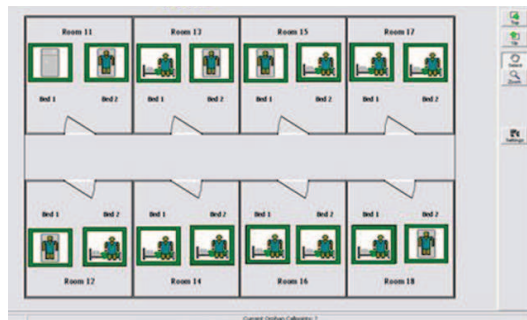

## HOSPITAL-WIDE BED STATUS A CONNEXALL SOLUTION

### Improve Patient Flow and Staff Communication

Is finding available hospital beds a regular challenge for your organization? Would your staff members benefit from an enhanced ability to turn beds over quickly?

### How It Works

Many hospitals face a constant stream of heavy patient traffic – staff need to be ready to respond to multiple requests at any time. Connexall gives healthcare organizations the power to dramatically improve patient flow by managing bed status information. Now it's easier than ever before to communicate requests for bed turn-over and indicate bed availability – at the mere press of a button! Using Connexall to seamlessly integrate wireless devices to your existing Admission, Discharge, and Transfer (ADT) software means that staff know when and where available beds are, and room turn-over requests are automated.

Bed Status as seen on Connexall's Mapping Alarm Client

Would you like to improve staff ability to access information? Would you like your ADT software to collaborate with your existing Nurse call system, Code Alarms, or other workflow solutions? Integrating all of these with Connexall means patient status is updated in real-time for the benefit of clinicians, porters, and support staff. Eliminate potential confusion, delays in patient flow, and costly wait-times by simply enhancing your existing tools – leverage the optimal performance for the tools you already have!

### Results you can count on

London Health Sciences Centre in London, Ontario reduced the average length of stay in their Emergency Room by 17% and reduced the number of patients leaving without being seen from 5% to 2% by implementing a multi-campus Connexall Bed Status solution.

### Reporting

Included in the core of Connexall is robust management reporting capability, providing management teams with data relevant to their specific departments, and allowing for precise fine tuning of workflow processes. Managers can leverage this tool to improve overall operational efficiency and manage workload.

# Connecting healthcare environments to the power of information immediacy.

## Additional Integration

Easily integrate new devices and monitoring software, or adapt new tools and procedures in your facilities. Connexall integrates with virtually any business system including: wireless phone systems, HL7, paging controllers, patient monitors, telemetry, security systems, fire alarms, access control, PBX, network equipment, HVAC and many more. At one central location, staff can manage and monitor events from different business systems.

## Simple to Use, Easy to Learn

Connexall's user interface is intuitive - so staff training is easy. With one touch of a button, supplies can be requested, staff can be contacted, calls can be forwarded, and reports can be generated. Acknowledging requests, signing in or out, and escalating calls takes mere seconds – ensuring efficiency. With improved communication, patient flow, staff accountability, and data measurement, clinicians can spend more time on what matters most - quality patient care.

Connexall's icon-based displays make learning and using the software easy

- ✓ Instant notification to any communication device inform staff of patient transfers, admissions, or discharges
- ✓ Increase staff efficiency and speed up patient flow
- ✓ Communication acknowledgment: on receipt of alarm, staff can acknowledge, escalate, or cancel a low-priority event
- ✓ Monitor multiple sites: view bed status across multiple wings or buildings, expediting inter-site transfers
- ✓ Leverage existing technology infrastructure: Connexall is completely vendor-neutral – allowing you to enhance existing equipment, or choose new, best-of-breed systems
