

CONNECTING YOU TO THE POWER OF  
**INFORMATION IMMEDIACY™**

# **PATIENT MONITORING**

## A CONNEXALL® SOLUTION

### How It Works

As more healthcare facilities adopt new tools to improve care, staff are expected to operate multiple diagnostic systems, communication devices, alarm systems, and manage patient requests. Unfortunately, slow connections, multiple systems, and constant overhead pages make it harder than ever for staff to prioritize their workload. Connexall integrates multiple tools and technology, resulting in immediate patient-to-staff communications, complete nurse mobility, and a quieter healing environment for patients. As patient calls get answered — by the right person, at the right time — quality of care and patient satisfaction improve significantly.

Would you like to improve staff ability to access patient information while staying mobile? Integrating your diagnostic equipment means clinicians can conduct assessments en route to patients. On or off-site, staff can continue to receive critical data updates, making it easier than ever to respond to sudden changes in patient conditions. By integrating to a nearly-infinite number of systems and devices, Connexall lets you extend the life of your current systems and optimize the performance of ALL of your devices.

### Filtering Nuisance Alarms

Based on your specific needs, medical equipment, and workflows, you can customize the level at which Connexall delivers alarms.

Unique to Connexall, alarm filtering allows you to ensure alarms are only triggered when they are clinically critical and require attention, ensuring staff will respond without delays.

### Reporting

Included in the core of Connexall is robust management reporting capability, providing management teams with data relevant to their specific departments, and allowing for precise fine tuning of workflow processes. Managers can leverage this tool to improve overall operational efficiency and manage workload.

### Additional Integration

Easily integrate new devices and monitoring software, or adapt new tools and procedures in your facilities. Connexall integrates with virtually any business system including: wireless phone systems, HL7, paging controllers, patient monitors, telemetry, security systems, fire alarms, access control, PBX, network equipment, HVAC and many more. At one central location, staff can manage and monitor events from different business systems.

# Connecting healthcare environments to the power of information immediacy.

## Simple to Use, Easy to Learn

Connexall's user interface is intuitive - so staff training is easy. With one touch of a button, supplies can be requested, staff can be contacted, calls can be forwarded, and reports can be generated. Acknowledging requests, signing in or out, and escalating calls takes mere seconds – ensuring efficiency. With improved communication, patient flow, staff accountability, and data measurement, clinicians can spend more time on what matters most - quality patient care.

## Results you can count on

At St Vincent Heart Center of Indiana (SVHCI), Connexall transformed productivity by enhancing the quality of care and time staff spent with patients.

Dramatic results speak for themselves:

- Alerts acknowledged within 60 seconds, reducing response time to an alarm by as much as four minutes
- Staff can use virtually any device: no need to invest in expensive new hardware
- Staff receive critical updates and alarm information in real time, enabling timely, appropriate action

## Why Connexall?

“Connexall was chosen for its versatility. Connexall has the capability of providing a base platform that can be configured with additional nodes for expansion in the future. It is user-friendly and has a great team to support the product. Monetary value played a very important role as well.”

-Stephen Rocha  
Process Leader of Clinical Engineering  
St Vincent Heart Center of Indiana

- ✓ Send alarms and notifications to mobile clinical staff from a variety of monitoring systems, including vital sign and blood pressure monitors, ventilators, and smart IV pumps
- ✓ Instant notification to any communication device can relay vital diagnostic information, patient requests, alarms, and events
- ✓ Optimize workflow with better communication: on receipt of alarm, staff can acknowledge, escalate, call back or cancel
- ✓ One-touch callback: instantly return messages or calls with one button
- ✓ Alarm filtering allows you to ensure alarms are only triggered when they are clinically critical and require attention, ensuring staff will respond without delays
- ✓ Create quieter healing environment for patients, improving patient care and increasing satisfaction
- ✓ Leverage existing technology infrastructure: Connexall is completely vendor-neutral – allowing you to enhance existing equipment, or choose new, best-of-breed systems
